Professional Summary

Junior Software Developer who turns ideas into working applications. Completed a year-long program building projects in JavaScript, React, C# and SQL, including web apps, games and REST APIs. Persistent, curious and reliable with strong work ethic ready to contribute to a team.

Technical Skills

Languages and Frameworks: JavaScript, TypeScript, HTML, CSS, C#, Dart, .NET (MVC, LINQ), C++, Java, Flutter, Tailwind, SQL, PHP, React, React Native, Entity Framework Core

Tools & Technologies: VS Code, Visual Studio, GitHub, NodeJS, JSON, ASP.NET SSMS, REST APIs, Unity, Godot, Jira, Service Now, NuGet, Netcracker, Supabase, Firebase, Maestro

Projects

- **Fitness Tracker:** Fitness tracker web app built with React which includes user authentication with Firebase, where users can schedule and track workouts and results.
- **Notes App:** Built in React Native with user authentication and Appwrite.io backend.
- **Uber Eats Clone:** Front-end web app built with JavaScript and JSON mock database; features dynamic shopping cart with automatic total calculation.

Work Experience

Software Engineer Intern - *The Bobo App* (June-August 2026)

- Developed and maintained features for mobile and web applications using Flutter (Dart), TypeScript and Supabase
- Built automated end-to-end tests and contributed to CI workflows to improve application readability and release quality
- Leveraged AI-assisted development tools such as Claude throughout development lifecycle including solution design, debugging, testing, documentation and code review
- Worked with REST APIs, Firebase Remote Config and Supabase (PostgreSQL)
- Collaborated using GitHub pull requests, and Agile development practices

Education

Software Developer Certificate - *Manitoba Institute of Trades & Technology* | Winnipeg, MB (Sept. 2025-Aug. 2026)

- 12-month program covering web, desktop and database development
- Built interactive web apps, games, API-integrated apps and database-driven applications
- Gained hands-on skills in OOP, algorithms, data structures and design patterns
- Applied Git, automation tools and technical writing practices
